

Design and Engineering Services

Aquattica Pools & Water Parks offers specialty services that take you from concept to completion.

Building or renovating a swimming pool, natatorium, or aquatics facility can seem costly. We approach our service to clients with cost-control as a priority. Our goal is to offer the services listed below that create a comprehensive program, while carefully coordinating with the other service providers and staying within budget and on schedule.

- Proposal development
- Delivery of necessary design and engineering programs
- Design studies
- Budget consulting
- Equipment evaluations
- Space requirement consultations
- Review for current code and safety requirements
- References for qualified architects/engineers/pool contractors
- Assistance with an appropriate scope of work for the specialty pool contractor
- Review and stamp pool plans for construction
